

## Student Response System Grant Application

### Overview

*Beyond Question Learning Technologies* is an innovative company specializing in affordable student response systems that assist educators in interacting more effectively with students in the classroom. The company understands the challenge of keeping students involved and interested in learning while working on a tight budget, and is very pleased to be able to offer financial assistance to teachers and administrators that are striving to accomplish those goals.

Student response systems allow an instructor to receive instant feedback from students by giving each student a handheld, remote control device that allows every member of the class to participate on an ongoing basis. These systems complement traditional teaching methods while accommodating students with different learning styles. The *Beyond Question* software is designed to be very easy to use, automatically adapting to the unique, individual teaching style of the instructor. Teachers can prepare rosters and lessons ahead of time with the software or use existing materials including handouts, transparencies, word processing documents, and PowerPoint® presentations.

A set of *Beyond Question* remotes costs less than a single set of textbooks (even before grants), can easily be used with multiple classes, and engages students by focusing their attention. *Beyond Question Learning Technologies* wants every teacher to have the opportunity to experience the kind of enjoyable, interactive learning process that this technology makes possible, so the company is offering educators **\$1,000** grants toward the purchase of a class set of *Beyond Question*. The set includes thirty student remotes with batteries, a receiver, an instructor's remote, and the *Beyond Question* software.

Product	Price before Grant	Price with Grant
<b>Class Set</b> Includes 30 Remotes, 1 Receiver, Software, Instructor's Remote	\$1,399	<b>\$399</b>

### Deadlines

The Beyond Question grant program is for a limited time. Grant applications will be accepted for at least thirty days after you receive the application from the company, but longer periods are not guaranteed. If you have a specific timeframe that you need the company to accommodate, we will be happy to work with you. Just contact us at [sales@bqlearning.com](mailto:sales@bqlearning.com) and explain your needs.

### Eligibility

These grants are intended primarily for K-12 educators (both public and private). That includes teachers, administrators, media specialists, and other personnel that would use the equipment in a K-12 environment. If you have any questions about whether or not you or your institution is eligible, please contact us at [sales@bqlearning.com](mailto:sales@bqlearning.com).

### Processing Time

Your grant will be handled as quickly as possible. However, due to high demand, you should allow up to six months for processing. If you would like to receive grant funds more quickly, there are alternate grants listed on the application. These grants are for slightly smaller amounts and have correspondingly shorter processing times.

## Student Response System Grant Application

### Application Process

*Beyond Question Learning Technologies* wants to make this a very easy process. To apply, please complete the form below and attach your one-page proposal. Please note that by submitting your application you agree that the company may post your ideas on our website or in other formats in order to share your ideas with others.

If you have any questions regarding this grant, please contact us at [sales@bqlearning.com](mailto:sales@bqlearning.com).

### Applicant

Date: \_\_\_\_\_

Contact Name: \_\_\_\_\_ Position: \_\_\_\_\_

E-mail: \_\_\_\_\_ Phone: \_\_\_\_\_

Grade & Subject: \_\_\_\_\_

### School Info.

Name: \_\_\_\_\_

School Address: \_\_\_\_\_

City / State / Zip: \_\_\_\_\_

Website: \_\_\_\_\_

School Phone: \_\_\_\_\_ Fax: \_\_\_\_\_

### Proposal

Please attach a one page summary of how you would use a student response system to support innovative ideas in the classroom and to enhance student learning (i.e. using it with other technologies; aligning lesson plans to state standards; engaging students in experiential learning; innovative teaching ideas; formative assessments of classroom instruction, etc.).
